

Welcome to the Child Welfare Centre!

All children aged 0 to 6 years, who live in Sweden, are offered free vaccinations and health examinations at the Child Welfare Centre.

We have reserved a time for your child

The purpose of the visit is to discuss your child's state of health, measure his/her height and weight, and find out whether your child needs any more vaccinations.

If you are unable to come to the appointment, please contact us so we can arrange a new time.
